LEGENDEX

ABSOLUTE POWER

(Please Handle Responsibly)

THE NEW LEGENDEX POWER COMMAND MODULE

A POWERFUL SYNERGY

Pairing the new Legendex Power Command Module with a Legendex exhaust more than doubles the grunt & rumble - but we know you can handle it.

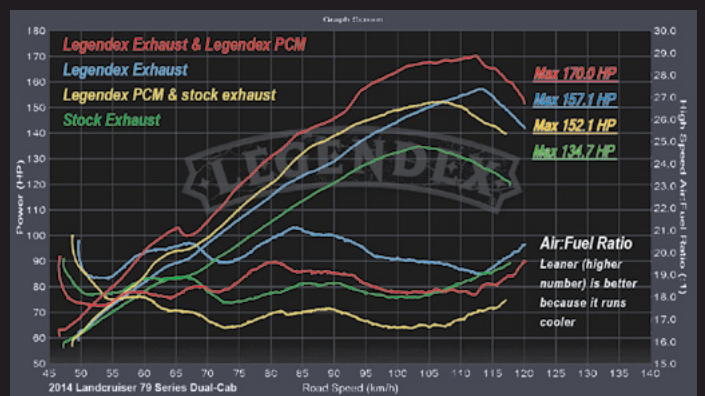

Unique performance - It's the only enhanced power module specifically performance tuned for your Legendex exhaust. Most after-market chips are tuned for the smaller, more restrictive stock exhausts - sending unnecessarily high fuel pressures. Now you can safely get maximum gains from your Legendex exhaust.

You're guaranteed better results ...

- + up to 40% hp & torque gains (on 'responsible' setting)
 - + significantly increased fuel economy
 - + cooler engine temperatures
 - + extended engine life from more efficient power
- ... when paired with your Legendex exhaust.

Safe, reliable gains - The Legendex Power Command Module operates within your engine's factory safety parameters so it will not void your factory warranty. Plus you're covered by the 5 Year Legendex Off-Road Warranty.

Easy fitting - Simply plug it in then dial in the level of power you desire - from responsible to absolute corruption.

Dyno of a 2014 Landcruiser comparing all possible exhaust & PCM configurations. Maximum gains are achieved with the Legendex exhaust and PCM together. That combination also runs the leanest air/fuel ratio - most desirable because it's the coolest & most economical.

7 REASONS TO CHOOSE LEGENDEX PERFORMANCE EXHAUSTS

Ceramic coated, hand-crafted dump pipe reduces engine temps

1 Bred tough in the outback.

Breaking an exhaust miles from anywhere can be an unpleasant experience - choking fumes, excessive noise and often a big loss of power. Constant vibrations from unsealed corrugations or off-road driving can be deadly on exhausts - cracking or breaking if they're not built ultra-heavy-duty. Legendex is the toughest exhaust out there.

- 409 grade stainless mandrel-bent tube, sourced from the same mill that supplies Toyota, also used by Nissan.
- Ceramic coated hand-crafted dump pipes built 30% thicker than other dump pipes.
- The strongest heavy-duty brackets & hangers built to cradle the pipe & to absorb vibration
- 12mm thick turbo flange, low profile 2-bolt connector flanges for maximum clearances
- 800 degree thermal coating on the tube
- Heavy-duty diesel cats with high-flow 200 cell stainless cores (not ceramic) & heat shield
- Heavy-duty stainless mufflers with stainless-wool wrapped internals never need re-packing

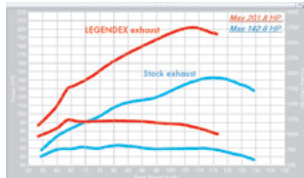

Ultra-strong hangers

2 Greater power gains for improved towing and fuel economy.

You are guaranteed to gain at least 10% power in the rev range where you need that extra torque - towing and climbing those big hills. Less turbo lag and more responsive power.

When combined with the right tune, power gains are typically 20 to 35%. Most customers see fuel savings from 8-12%. A Legendex exhaust will not void your new vehicle warranty - so it is the logical choice for easy power gains.

3 Reduced engine temperatures.

High-flow stainless core diesel specific cat

It's a common complaint - engines over-heating when you are touring - but it needn't be so. The fact is stock exhausts restrict exhaust gas flow creating higher engine temps because the hot gas is not escaping as fast as it could. The engine works harder, is less efficient and that also drives up engine temps.

Legendex have ceramic coated dump pipes as standard. This coating insulates the engine bay from the exhaust heat by a reduction of 100-200 degrees C.

Plus, superior dump design and high-flow cats ensures the hot gasses are expelled more efficiently - the engine makes more power and operates cooler - great news if you're towing uphill!

4 Legendex has an unrivalled 10 Year Warranty.

The terms of a warranty are a good indication of how long the manufacturer thinks their exhaust will last - and under what sort of treatment - sealed road or off-road where the real 4wders go. Because Legendex is built to outlast, we can confidently offer an unrivalled 10 Year Warranty.

THE LAST EXHAUST YOU'LL EVER NEED

5 Australia's only off-road exhaust warranty ... & the only transferable warranty.

Most stock exhausts are not covered by warranty when you're driving off-road. If you have an after-market exhaust you are not covered either ... except if you have a Legendex. Only Legendex carries a warranty that covers you off-road. Legendex are so good they also carry Australia's only transferable warranty - good news for your vehicle's resale value.

6 Easy DIY bolt-on fit guaranteed.

Legendex exhaust systems fit perfectly - just bolt-on to the factory mount points, guaranteed. Other 'heavy-duty' exhausts require new mounts to be welded to your chassis and pan - that can cost you around 8 extra hours of professional labour to fit. Legendex saves you big dollars in professional fitting time or, if you're doing it DIY, you'll avoid hours of extreme frustration.

7 Only Legendex has a 60 day satisfaction money-back guarantee.

If you're not entirely satisfied with your Legendex exhaust simply return it to us within 60 days for a full purchase price and outbound shipping refund. No other exhaust manufacturer offers this satisfaction guarantee.

Proudly Australian designed and built by

PERFORMANCE EXHAUSTS

GRUNT & RUMBLE

YOUR GRIN IS GUARANTEED

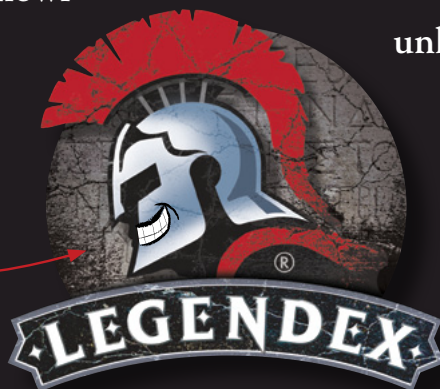

If the grunt and rumble of your Legendex 4wd off-road exhaust doesn't get you grinning from ear to ear (for all the right reasons of course) we'll give your money back!

GRUNT ... is worth a thousand words. When your 4wd responds to every nuance of the throttle, pushing you back in your seat, that's grunt. It doesn't lag and it doesn't wallow like a fat man in the bathtub. Grunt drives like ACDC on the Highway to Hell and the turbo wants to howl like a banshee.

RUMBLE ... commands respect. It turns heads and makes Legendex distinct from the rest. It's not harsh and it doesn't drone when you're towing. Rumble is that subtle note of menace that we secretly love. Rumble defines the warrior before his battle fury is unleashed.

Sounds like a
Legendex

UNI FILTER

THE BEST OFF-ROAD AIRFILTER

Improved fuel economy, more power and more effective air filtering off-road.

Dust can quickly reduce airflow through your air filter. A choked filter will have a significant, negative impact on fuel economy, power and engine temperature as the engine has to work harder to produce the required power. In fact the world's leading manufacturer of oiled cotton filters recommends oiled foam outers when used in dusty conditions.

Round filter type showing the dual foam elements. Available as rectangular or round filters specific to each vehicle.

Unifilters are the best...

- **More power** - 24% more flow than stock paper filters - you'll notice an immediate power improvement because of the superior air flow.
- **Washable** – re-using a washable filter gives excellent value and long-life.
- **Better off-road** - Dust particles in your engine are bad ... bulldust is so fine it can penetrate through some filters.
- **An easy system** - It's easy to carry a spare foam outer element during off-road trips – they fold flat and take up no room. You get a spare foam outer with each combo kit. Plus, for long trips, you can take the complete service kit of cleaner, bucket and oil.
- **Over 10 times more effective** in filtering small dust particles - 4µm compared with K&N (45µm) or stock filter (30µm).
- **Better value** than stock paper filters. It's paid for itself after only a couple of services because otherwise you would be buying a new stock filter each time.
- Unifilters are **made in Australia**.

Off-Road Combo Kit

Great value compared with buying items separately!
Contains everything you need to carry out essential air filter maintenance either at home or "out on the track"

Packs include:

- 1 x Unifilter air filter inner foam element
- 2 x Unifilter air filter outer foam elements (1 spare)
- 1 x bottle Unifilter "Filter fix" filter oil
- 1 x bottle Unifilter "Citrus-based Foam Filter Cleaner"
- 1 x pair servicing gloves
- 1 x cleaning cloth
- 1 x servicing bucket

UNI FILTER
